Work Experience

Jr. MERN Stack Developer
Sparkle Infotech

[December 2023 – Present]

Projects:

- SKU Markets (Wholesaler e-commerce):
 - Developed interactive UI components using React.js and managed state with Redux Toolkit.
 - Optimized performance for seamless user experience and integrated backend APIs.
 - Worked on dynamic routing and navigation using React Router.
- Rediminds (AI):
 - Contributed to both backend and frontend development to build a robust AI-driven platform.

- Designed and developed RESTful APIs for data retrieval and submission using Node.js and Sequelize ORM.
 - Ensured efficient database interactions by implementing complex queries and schema optimization.
 - Enhanced the user interface with dynamic components, ensuring a responsive and intuitive experience.
 - Zync:
 - Developed a dynamic content management system (CMS) using Webflow, enabling seamless updates and management of educational resources.
 - Focused on optimizing usability and workflows for seamless content updates.
 - Collaborated with cross-functional teams to ensure project goals were met efficiently.
-

Education
